Table of Contents for CWORKS/26

Selected Works of Philip A. Griffiths with Commentary

Part 1

- Variations of Hodge structure considered as an exterior and differential system: Old and new results
  by James Carlson; Mark Green; Phillip Griffiths
- Introduction from Mumford-Tate groups and domains: Their geometry and arithmetic
  by Mark Green; Matt Kerr
- Introduction from Introduction to Hodge theory, complex geometry, and representation theory
  by Mark Green; Matt Kerr
- The Gauss equations and rigidity of isometric embeddings
  by Eric Berger; Robert Bryant; Phillip Griffiths
- Characteristics and existence of isometric embeddings
  by Robert L. Bryant; Phillip A. Griffiths; Deane Yang
- Extremal degenerations of polarized Hodge structures
  by Mark Green; Phillip Griffiths; Colleen Robles
- Quotients of non-classical flag domains are not algebraic
  by Phillip Griffiths; Colleen Robles; Domingo Toledo
- Néron models and boundary components for degenerations of Hodge structure of mirror quintic type
  by Mark Green; Phillip Griffiths; Matt Kerr
- Néron models and limits of Abel-Jacobi mappings
  by Mark Green; Phillip Griffiths; Matt Kerr

- Cycles over fields of transcendence degree 1
  by Mark Green; Phillip A. Griffiths; Kapil H. Paranjape
- Hodge-theoretic invariants for algebraic cycles
  by Mark Green; Phillip Griffiths
- An interesting 0-cycle
  by Mark Green; Phillip Griffiths
- Formal deformation of Chow groups
  by Mark Green; Phillip Griffiths
- On the tangent space to the space of algebraic cycles on a smooth algebraic variety
  by Mark Green; Phillip Griffiths
- Algebraic cycles and singularities of normal functions, I
  by Mark Green; Phillip Griffiths
- Algebraic cycles and singularities of normal functions, II
  by Mark Green; Phillip Griffiths
