## A First Course in Sobelev Spaces

- Part 1. Functions of one variable
  - ◆ Monotone functions
  - ◆ Functions of bounded pointwise variation
  - ◆ Absolutely continuous functions
  - ◆ Decreasing rearrangement
  - ◆ Curves
  - ◆ Lebesgue–Stieltjes measures
  - ◆ Functions of bounded variation and Sobolev functions
  - ◆ The infinite-dimensional case
- Part 2. Functions of several variables
  - ◆ Change of variables and the divergence theorem
  - ◆ Distributions
  - ◆ Sobolev spaces
  - ◆ Sobolev spaces: Embeddings
  - ◆ Sobolev spaces: Further properties
  - ◆ Functions of bounded variation
  - ◆ Sobolev spaces: Symmetrization
  - ◆ Interpolation of Banach spaces
  - ◆ Besov spaces
  - ◆ Sobolev spaces: Traces
  - ◆ Appendix A. Functional analysis
  - ◆ Appendix B. Measures
  - ◆ Appendix C. The Lebesgue and Hausdorff measures
  - ◆ Appendix D. Notes
  - ◆ Appendix E. Notation and list of symbols
  - ◆ Bibliography
  - ◆ Index
