Table of Contents for GSM/181

A First Course in Sobolev Spaces

• Part 1. Functions of one variable
  ♦ Monotone functions
  ♦ Functions of bounded pointwise variation
  ♦ Absolutely continuous functions
  ♦ Decreasing rearrangement
  ♦ Curves
  ♦ Lebesgue–Stieltjes measures
  ♦ Functions of bounded variation and Sobolev functions
  ♦ The infinite-dimensional case

• Part 2. Functions of several variables
  ♦ Change of variables and the divergence theorem
  ♦ Distributions
  ♦ Sobolev spaces
  ♦ Sobolev spaces: Embeddings
  ♦ Sobolev spaces: Further properties
  ♦ Functions of bounded variation
  ♦ Sobolev spaces: Symmetrization
  ♦ Interpolation of Banach spaces
  ♦ Besov spaces
  ♦ Sobolev spaces: Traces
  ♦ Appendix A. Functional analysis
  ♦ Appendix B. Measures
  ♦ Appendix C. The Lebesgue and Hausdorff measures
  ♦ Appendix D. Notes
  ♦ Appendix E. Notation and list of symbols
  ♦ Bibliography
  ♦ Index
