CONTENTS

Preface  xi
Preliminaries  1

1

TOOLS FOR ANALYSIS  5
1.1 The Completeness Axiom and Some of Its Consequences  5
1.2 The Distribution of the Integers and the Rational Numbers  12
1.3 Inequalities and Identities  16

2

CONVERGENT SEQUENCES  23
2.1 The Convergence of Sequences  23
2.2 Sequences and Sets  35
2.3 The Monotone Convergence Theorem  38
2.4 The Sequential Compactness Theorem  43
2.5 Covering Properties of Sets*  47

3

CONTINUOUS FUNCTIONS  53
3.1 Continuity  53
3.2 The Extreme Value Theorem  58
3.3 The Intermediate Value Theorem  62
3.4 Uniform Continuity  66
3.5 The \( \epsilon-\delta \) Criterion for Continuity  70
3.6 Images and Inverses; Monotone Functions  74
3.7 Limits  81

4

DIFFERENTIATION  87
4.1 The Algebra of Derivatives  87
4.2 Differentiating Inverses and Compositions  96
4.3 The Mean Value Theorem and Its Geometric Consequences  101
4.4 The Cauchy Mean Value Theorem and Its Analytic Consequences  111
4.5 The Notation of Leibnitz  113
5*  
ELEMENTARY FUNCTIONS AS SOLUTIONS OF DIFFERENTIAL EQUATIONS  116  
5.1 Solutions of Differential Equations  116  
5.2 The Natural Logarithm and Exponential Functions  118  
5.3 The Trigonometric Functions  125  
5.4 The Inverse Trigonometric Functions  132  

6  
INTEGRATION: TWO FUNDAMENTAL THEOREMS  135  
6.1 Darboux Sums; Upper and Lower Integrals  135  
6.2 The Archimedes–Riemann Theorem  142  
6.3 Additivity, Monotonicity, and Linearity  150  
6.4 Continuity and Integrability  155  
6.5 The First Fundamental Theorem: Integrating Derivatives  160  
6.6 The Second Fundamental Theorem: Differentiating Integrals  165  

7*  
INTEGRATION: FURTHER TOPICS  175  
7.1 Solutions of Differential Equations  175  
7.2 Integration by Parts and by Substitution  178  
7.3 The Convergence of Darboux and Riemann Sums  183  
7.4 The Approximation of Integrals  190  

8  
APPROXIMATION BY TAYLOR POLYNOMIALS  199  
8.1 Taylor Polynomials  199  
8.2 The Lagrange Remainder Theorem  203  
8.3 The Convergence of Taylor Polynomials  209  
8.4 A Power Series for the Logarithm  212  
8.5 The Cauchy Integral Remainder Theorem  215  
8.6 A Nonanalytic, Infinitely Differentiable Function  221  
8.7 The Weierstrass Approximation Theorem  223  

9  
SEQUENCES AND SERIES OF FUNCTIONS  228  
9.1 Sequences and Series of Numbers  228  
9.2 Pointwise Convergence of Sequences of Functions  241

15

APPROXIMATING NONLINEAR MAPPINGS BY LINEAR MAPPINGS 394
15.1 Linear Mappings and Matrices 394
15.2 The Derivative Matrix and the Differential 407
15.3 The Chain Rule 414

16

IMAGES AND INVERSES: THE INVERSE FUNCTION THEOREM 421
16.1 Functions of a Single Variable and Maps in the Plane 421
16.2 Stability of Nonlinear Mappings 429
16.3 A Minimization Principle and the General
   Inverse Function Theorem 433

17

THE IMPLICIT FUNCTION THEOREM AND ITS APPLICATIONS 440
17.1 A Scalar Equation in Two Unknowns: Dini's Theorem 440
17.2 The General Implicit Function Theorem 449
17.3 Equations of Surfaces and Paths in $\mathbb{R}^3$ 454
17.4 Constrained Extrema Problems and Lagrange Multipliers 460

18

INTEGRATING FUNCTIONS OF SEVERAL VARIABLES 470
18.1 Integration of Functions on Generalized Rectangles 470
18.2 Continuity and Integrability 482
18.3 Integration of Functions on Jordan Domains 489

19

ITERATED INTEGRATION AND CHANGES OF VARIABLES 498
19.1 Fubini's Theorem 498
19.2 The Change of Variables Theorem: Statements and Examples 505
19.3 Proof of the Change of Variables Theorem 510

20

LINE AND SURFACE INTEGRALS 520
20.1 Arclength and Line Integrals 520
20.2 Surface Area and Surface Integrals 533
20.3 The Integral Formulas of Green and Stokes 543
| A | CONSEQUENCES OF THE FIELD AND POSITIVITY AXIOMS | 559 |
|   | A.1 The Field Axioms and Their Consequences | 559 |
|   | A.2 The Positivity Axioms and Their Consequences | 563 |
| B | LINEAR ALGEBRA | 565 |
