# Table of Contents

## Preface

ix

## Part 1: Background

### Doctoral Production in Mathematics Education in the United States: 1960-2005

Robert Reys, University of Missouri
Robert Glasgow, Southwest Baptist University
Dawn Teuscher, Arizona State University Polytechnic Campus
Nevels Nevels, University of Missouri

3

### Doctoral Programs in Mathematics Education in the United States: 2007 Status Report

Robert Reys, University of Missouri
Robert Glasgow, Southwest Baptist University
Dawn Teuscher, Arizona State University Polytechnic Campus
Nevels Nevels, University of Missouri

19

### Report of a 2007 Survey of U. S. Doctoral Students in Mathematics Education

Dawn Teuscher, Arizona State University Polytechnic Campus
Nevels Nevels, University of Missouri
Catherine Ulrich, University of Georgia

39

## Part 2: Developing Stewards of the Discipline: Core Elements

### Creating a Broader Vision of Doctoral Education: Lessons from the Carnegie Initiative on the Doctorate

Chris M. Golde, Stanford University

53

### What Core Knowledge do Doctoral Students in Mathematics Education Need to Know?

Joan Ferrini-Mundy
National Science Foundation

63

### Breakout Sessions:

- The Mathematical Education of Doctorates in Mathematics Education
  - Daniel Chazan, University of Maryland
  - W. James Lewis, University of Nebraska-Lincoln

75

- Curriculum as Core Knowledge
  - Rose Mary Zbiek, The Pennsylvania State University
  - Christian R. Hirsch, Western Michigan University

87
Making Policy Issues Visible in the Doctoral Preparation of Mathematics Educators 97
Edward Silver, University of Michigan
Erica Walker, Teachers College, Columbia University

Preparing Teachers in Mathematics Education Doctoral Programs: Tensions and Strategies 103
Patricia S. Wilson, University of Georgia
Megan Franke, University of California at Los Angeles

Doctoral Programs in Mathematics Education: Diversity and Equity 111
Edd V. Taylor, Northwestern University
Richard Kitchen, University of New Mexico

M. Kathleen Heid, The Pennsylvania State University
Hollylynne S. Lee, North Carolina State University

Part 3: Developing Stewards of the Discipline: Delivery Systems 129
Program Delivery Issues, Opportunities, and Challenges
Denise S. Mewborn, University of Georgia

Breakout Sessions:
Doctoral Preparation of Researchers 139
James A. Middleton, Arizona State University
Barbara Dougherty, University of Mississippi

Key Components of Mathematics Education Doctoral Programs in the United States: Current Practices and Suggestions for Improvement 147
William S. Bush, University of Louisville
Enrique Galindo, Indiana University

On-line Delivery of Graduate Courses in Mathematics Education 155
Maurice Burke, Montana State University
Vena M. Long, University of Tennessee

Mathematics Education Doctoral Programs: Approaches to Part-Time Students 163
Gladis Kersaint, University of South Florida
Gerald A. Goldin, Rutgers University

Induction of Doctoral Graduates in Mathematics Education into the Profession 169
Barbara J. Reys, University of Missouri
Gwendolyn M. Lloyd, Virginia Tech
Karen Marrongelle, Portland State University
Matthew S. Winsor, University of Texas, El Paso
TABLE OF CONTENTS vii

Part 4: Doctoral Programs in Mathematics Education: Some International Perspectives

Doctoral Programs in Mathematics Education: An International Perspective 177

Jeremy Kilpatrick, University of Georgia

Doctoral Studies in Mathematics Education: Unique Features of Brazilian Programs 181

Beatriz S. D’Ambrosio, Miami University

Nordic Doctoral Programs in Didactics of Mathematics 189

Barbro Grevholm, University of Agder, Norway

Japanese Doctoral Programs in Mathematics Education: Academic or Professional 195

Masataka Koyama, Hiroshima University, Japan

Post-Graduate Study Program in Mathematics Education at the University of Granada (Spain) 203

Luis Rico, University of Granada
Antonio Fernández-Cano, University of Granada
Encarnación Castro, University of Granada
Manuel Torralbo, University of Granada

Part 5: Accreditation

Accreditation of Doctoral Programs: A Lack of Consensus* 215

*Panel consisted of Jere Confrey, North Carolina State University, Jenny Bay-Williams, University of Louisville, Skip Fennell, McDaniel College and Mark Klespis, Sam Houston State University and moderated by Glenda Lappan, Michigan State University. This report was prepared by:

Glenda Lappan, Michigan State University
Jill Newton, Purdue University
Dawn Teuscher, Arizona State University Polytechnic Campus

Part 6: Reflections from Within

Preparing the Next Generation of Mathematics Educators: An Assistant Professor’s Experience 223

Andrew Tyminski, Purdue University

Mathematics Content for Elementary Mathematics Education Graduate Students: Overcoming the Prerequisites Hurdle 229

David Kirshner, Louisiana State University
Thomas Ricks, Louisiana State University

Intellectual Communities: Promoting Collaboration Within and Across Doctoral Programs in Mathematics Education 233

Dawn Teuscher, Arizona State University Polytechnic Campus
Anne Marie Marshall, University of Maryland
Jill Newton, Purdue University
Catherine Ulrich, University of Georgia
Part 7: Closing Commentary
Reflecting on the Conference and Looking Toward the Future 241

James Hiebert, University of Delaware
Diana Lambdin, Indiana University
Steve Williams, Brigham Young University

Appendices:
A. List of Conference Participants 255
B. Conference Agenda 259
