Contents

Preface

The stable Galois correspondence for real closed fields
  J. Heller and K. Ormsby

An Étale realization which does NOT exist
  Jesse Leo Kass and Kirsten Wickelgren

Multiplicative structure on Real Johnson-Wilson theory
  Nitu Kitchloo, Vitaly Lorman, and W. Stephen Wilson

The Morita equivalence between parametrized spectra and module spectra
  John A. Lind and Cary Malkiewich

tmf is not a ring spectrum quotient of string bordism
  Carl McTague

Cocycle schemes and $MU(2k, \infty)$–orientations
  Eric Peterson

The linearity of fixed point invariants
  Kate Ponto and Michael Shulman

Homotopy coherent centers versus centers of homotopy categories
  Markus Szymik

Recent developments on noncommutative motives
  Gonçalo Tabuada

The category of Waldhausen categories is a closed multicategory
  Inna Zakharevich
