## Contents

Preface ix  
Foreword xi  
Biography of Peter Russell (through June, 2011) xiii  
Bibliography of Peter Russell xv  
Newton Trees at Infinity of Algebraic Curves  
*Pierrette Cassou-Noguès* 1  
Polynomials $f(X,Y,Z)$ of low LND-degree  
*Daniel Daigle* 21  
Corrigendum to Our Paper “Birational Transformations of Weighted Graphs”  
*Hubert Flenner, Shulim Kaliman, and Mikhail Zaidenberg* 35  
Bivariate Analogues of Chebyshev Polynomials with Application to  
Embeddings of Affine Spaces  
*Gene Freudenburg* 39  
The Pencil of Translates of a Line in the Plane  
*Richard Ganong* 57  
A Geometric Proof of Boutot’s Result on Singularities of Quotients  
*R. V. Gurjar* 73  
On the Present State of the Andersén – Lempert Theory  
*Shulim Kaliman and Frank Kutzschebauch* 85  
Group Actions on Affine Cones  
*Takashi Kishimoto, Yuri Prokhorov, and Mikhail Zaidenberg* 123  
$\mathbb{C}^*$ in $\mathbb{C}^2$ is Birationally Equivalent to a Line  
*Mariusz Koras* 165  
Initial Algebras and the Jung – van der Kulk Theorem  
*Shigeru Kuroda* 193  
Holomorphic Curves on Irregular Varieties of General Type Starting from  
Surfaces  
*Steven S.-Y. Lu* 205  
Locally Nilpotent Derivations of Affine Domains  
*L. Makar-Limanov* 221
Equivariant Derivations and Additive Group Actions
   Kayo Masuda  
   231

Frobenius Sandwiches of Affine Algebraic Surfaces
   M. Miyanishi  
   243

Automorphism Groups of Koras–Russell Threefolds of the First Kind
   L. Moser-Jauslin  
   261

Recent Progress in the Geometry of \( \mathbb{Q} \)-Acyclic Surfaces
   Karol Palka  
   271

On the Makar-Limanov, Derksen Invariants, and Finite Automorphism Groups of Algebraic Varieties
   Vladimir L. Popov  
   289

Embeddings of Hyperbolas
   Avinash Sathaye  
   313

Groups of Russell Type and Tango Structures
   Yoshifumi Takeda  
   327
