# Contents

Preface ix

**Workshop Lecture Notes**

Contramodules and their applications to tilting theory  
Silvana Bazzoni 3

Representations of finite sets and correspondences  
Serge Bouc 31

Three lectures on quiver Grassmannians  
Giovanni Cerulli Irelli 57

Higher symmetries in abstract stable homotopy theories  
Moritz Rahn 91

**Conference Proceedings Papers** 195

Cohomology of some local selfinjective algebras  
Karin Erdmann 197

On the cohomological Hall algebra of the Kronecker quiver  
H. Franzen and M. Reineke 213

The recollements of purity  
X. H. Fu and I. Herzog 227

Higher Auslander algebras of type A and the higher Waldhausen S-constructions  
Gustavo Jasso 249

A survey on maximal green sequences  
Bernhard Keller and Laurent Demonet 267

The Gerstenhaber bracket in Hochschild cohomology: Methods and examples  
Andrea Solotar 287
