# Table of Contents for CHEL/330.H

## Algebra

- Sets, functions, and integers
- Groups
- Rings
- Universal constructions
- Modules
- Vector spaces
- Matrices
- Special fields
- Determinants and tensor products
- Bilinear and quadratic forms
- Similar matrices and finite abelian groups
- Structure of groups
- Galois theory
- Lattices
- Categories and adjoint functors
- Multilinear algebra
- Appendix: Affine and projective spaces
- Bibliography
- Index
