

## Contents

Preface	ix
The Barcelona conference JOAN-CARLES LARIO	xi
My friend, Fumiyuki Momose V. KUMAR MURTY	xiii
An overview of the mathematical work of Fumiyuki Momose TAKESHI SAITO	1
A note on algebraic points on Shimura curves KEISUKE ARAI	9
On quadratic points of classical modular curves FRANCESC BARS	17
$p$ -adic point counting on singular superelliptic curves ROBERT M. BURKO	35
A refinement of a conjecture of Gross, Kohlen, and Zagier CARLOS CASTAÑO-BERNARD	53
A vanishing criterion for Dirichlet series with periodic coefficients TAPAS CHATTERJEE, M. RAM MURTY, and SIDDHI PATHAK	69
Rational families of 17-torsion points of elliptic curves over number fields MAARTEN DERICKX, BARRY MAZUR, and SHELDON KAMIENNY	81
An explicit integral representation of Siegel-Whittaker functions on $Sp(2, \mathbb{R})$ for the large discrete series representations YASURO GON and TAKAYUKI ODA	105
On implementation of GHS attack against elliptic curve cryptosystems over cubic extension fields of odd characteristic NAOKI HASHIZUME, FUMIYUKI MOMOSE, and JINHUI CHAO	125
The Sato-Tate conjecture for a Picard curve with complex multiplication (with an appendix by Francesc Fité) JOAN-CARLES LARIO and ANNA SOMOZA	151
Arithmetic twists and Abelian extensions V. KUMAR MURTY	167

Transcendental numbers and special values of Dirichlet series M. RAM MURTY	193
---	-----
