Contents

Preface ix
Acknowledgments x

Chapter 1. Higher order Fourier analysis 1
§1.1. Equidistribution of polynomial sequences in tori 2
§1.2. Roth’s theorem 26
§1.3. Linear patterns 45
§1.4. Equidistribution of polynomials over finite fields 59
§1.5. The inverse conjecture for the Gowers norm I. The finite field case 74
§1.6. The inverse conjecture for the Gowers norm II. The integer case 92
§1.7. Linear equations in primes 109

Chapter 2. Related articles 129
§2.1. Ultralimit analysis and quantitative algebraic geometry 130
§2.2. Higher order Hilbert spaces 149
§2.3. The uncertainty principle 162

Bibliography 179
