Index

Adapted sequence 40
ADHM construction 235
Asymptotically locally Euclidean (ALE) spaces 255
Anti-self-dual connection 236
finite energy 238, 255
Auslander–Reiten quiver 94
Barycentric subdivision 136
Binary polyhedral group 134
Bipartite graph 88
Borel–Moore homology 260
Cartan matrix 20, 273
decomposable 273
finite type 276
affine type 276
indefinite type 276
symmetrizable 275
Complexification of a real group 183
Composition algebra 78
Constructible
subset 61
function 62
Convolution algebra 262
Coroots 274
Coxeter element 42
adapted to an orientation 43
affine 108
Coxeter functors 85
Coxeter group 277
Coxeter number 42
Defect 109
Euler form 15
symmetrized 16, 21 275
Exceptional fiber 220, 242,
Extending vertex, 107
Flag variety 181, 213
Framing
of a quiver representation 200
of a sheaf 232
of a vector bundle with connection 239, 256
Gabriel’s theorem 32
Generic element 208
GIT quotient 161
twisted 165
Graded dimension 11
Grothendieck group 11
Hall algebra 48
of constructible functions 62
universal 51
Hamiltonian
action 175
reduction 177
Hecke correspondence 266
Hereditary category 14
Hilbert scheme 225
Hilbert–Chow morphism 226
Hyperkähler
manifold 186
moment map 187
quotient 187
Instanton 238, 255
  framed 239, 256
Isotropic submanifold 174
Jordan quiver 4
K-group 11
  equivariant 250, 151
Kac conjecture 131
Kac theorem 130
Kac–Moody algebra 277
Kähler manifold 183
Kronecker quiver 4, 111
Kleinian singularity 241
Lagrangian submanifold 174
Longest element in the Weyl group 44
McKay correspondence 141
Moment map 175
  hyperkähler 187
Morphism
  ℓètale 162
Mumford criterion 168
Nilpotent
  cone 181
  element 73
Path in a quiver 7
Path algebra 7
Poincaré–Birkhoff–Witt (PBW) basis
  60, 281
Poisson structure 172
Preprojective algebra 70, 146
Quiver 3
  cyclic 106
  double 69
  double loop 104
  Dynkin 16, 32
  Euclidean 16
  of finite type 31
  Jordan 4, 227
  Kronecker 4, 118
  tame 103
  wild 104
Quiver variety 205
Real form of an algebraic group 183
Regular polyhedron 134
  spherical 134
  Regular point 168, 210
Reductive group 161
Reduced expression, 280
  adapted to \( \bar{Q} \) 40
Reflection functors 33
Relative invariants 164
Representation of Kac–Moody Lie
  algebra
    highest weight 282
    integrable 283
    with weight decomposition 282
Representation of a quiver 3
  framed 200
  indecomposable 8
  injective 15
  projective 11
  preinjective 86, 112
  preprojective 86, 112
  regular 86, 112
  semisimple 8
  simple 8
Representation space 23
Resolution of singularities 169, 181, 227
  crepant 245
  minimal 242, 245
  symplectic 180
Ringel theorem 55
Root 279
  lattice 20, 274
  positive, negative 21, 279
  preinjective 87
  preprojective 87
  real, imaginary 21, 279
  simple 21, 274
  system 21
Schläfli symbol 134
Semisimplification 28
Semistable
  point 165
  representation 193, 198, 207
Serre relations 54, 65 278
Sheaves
  equivariant 146
  torsion 151
  torsion free 230
Simple reflection 21, 276
Sink 32
Slice 89
Source 32
Springer resolution 181
Stability parameter 192
Index

Stable
  point 167
  representation 193, 198, 207
Standard resolution 13
Steinberg variety 264
Symplectic manifold 172

Tits form 16
Translation quiver 88
Tube 116

Universal enveloping algebra 281
