Contents

Preface ix

Part I. BACKGROUND 1

Chapter 1. The University and the Polytechnic in Lvov 3

Chapter 2. Polish Mathematics at the Turn of the Twentieth Century 7

Chapter 3. Sierpiński’s Stay at the University of Lvov (1908–1914) 11

Chapter 4. The University in Warsaw and Janiszewski’s Program (1915–1920) 17

Chapter 5. World Mathematics (Active Fields in Poland) Around 1920 21

Part II. THE GOLDEN AGE: Individuals and Community 25

Chapter 6. The Mathematical Community in Lvov after World War I 27

Chapter 7. Mathematical Studies and Students 37

Chapter 8. Journals, Monographs, and Congresses 43

Chapter 9. The Popularization of Mathematics 49

Chapter 10. Social Life (the Scottish Café, the Scottish Book) 55

Chapter 11. The Polish Mathematical Society 63

Chapter 12. Collaboration with Other Centers 67

Chapter 13. In the Eyes of Others 69
  13.1. Stefan Banach 69
  13.2. Hugo Steinhaus 73
  13.3. Stanisław Mazur 76
  13.4. Kazimierz Kuratowski 77
  13.5. Stanisław Ulam 78
  13.6. Juliusz Schauder and Zbigniew Łomnicki 79
  13.7. Włodzimierz Stożek 80
  13.8. Herman Auerbach 81
  13.9. Others 81
Part III. THE GOLDEN AGE: Achievements

Chapter 14. Stefan Banach’s Doctoral Thesis and Priority Claims

Chapter 15. Probability Theory

Chapter 16. Measure Theory

Chapter 17. Game Theory: A Revelation Without Follow-up

Chapter 18. Operator Theory in the 1920s

Chapter 19. Methodological Audacity

Chapter 20. Banach’s Monograph: Polishing the Pearls

Chapter 21. Operator Theory in the 1930s: The Dazzle of Pearls

Chapter 22. New Perspectives for Which Time Did Not Allow
   22.1. Nonlinear functional analysis
   22.2. The theory of partial differential equations
   22.3. The theory of linear topological spaces
   22.4. The theory of recursive functions
   22.5. Algebra, specifically Banach algebras
   22.6. Noncommutative probability theory
   22.7. Graph theory
   22.8. Applications of mathematics
   22.9. Numerical analysis

Chapter 23. On the Periphery

Part IV. OBLIVION

Chapter 24. Ukrainization the Soviet Way (1939–1941)

Chapter 25. The German Occupation (1941–1944)

Chapter 26. The Expulsion of Poles (1945–1946)

Part V. HISTORICAL SIGNIFICANCE

Chapter 27. Chronological Overview

Chapter 28. Chronology of Events as Perceived Elsewhere

Chapter 29. Influence on Mathematics of the Lvov School

Chapter 30. A Tentative Summary

Chapter 31. Mathematics in Lvov after 1945
CONTENTS

Part VI. LIST OF LVOV MATHEMATICIANS 177
Mathematicians Associated with Lvov 179

Part VII. BIBLIOGRAPHIES 193
A. Mathematical Works by Lvov Mathematicians 195
B. Personal Recollections, Surveys, and Historical Source Material 205
C. Other Mathematical Works Cited 219

List of Illustrations and Acknowledgments 225
Index of Names 227
