**Diophantine Approximation and the Geometry of Limit Sets in Gromov Hyperbolic Metric Spaces**

- Introduction
- Gromov hyperbolic metric spaces
- Basic facts about Diophantine approximation
- Schmidt's game and McMullen's absolute game
- Partition structures
- Proof of Theorem 6.1 (Absolute winning of $\mathbb{BA}_\xi$)
- Proof of Theorem 7.1 (Generalization of the Jarní–Besicovitch Theorem)
- Proof of Theorem 8.1 (Generalization of Khinchin's Theorem)
- Proof of Theorem 9.3 ($\mathbb{BA}_d$ has full dimension in $\Lambda_{\mathbb{r}}(G)$)
- References
