List of Figures ix

Preface xi

Conventions and Dependence among Chapters xiii

Introduction 1

Chapter 1. Gradings on Algebras 9
  1.1. General gradings and group gradings 9
  1.2. The universal group of a grading 15
  1.3. Fine gradings 16
  1.4. Duality between gradings and actions 19
  1.5. Exercises 25

Chapter 2. Associative Algebras 27
  2.1. Graded simple algebras with minimality condition 28
  2.2. Graded division algebras over algebraically closed fields 33
  2.3. Classification of gradings on matrix algebras 38
  2.4. Anti-automorphisms and involutions of graded matrix algebras 49
  2.5. Exercises 60

Chapter 3. Classical Lie Algebras 63
  3.1. Classical Lie algebras and their automorphism group schemes 64
  3.2. \( \varphi \)-Gradings on matrix algebras 85
  3.3. Type \( A \) 105
  3.4. Type \( B \) 116
  3.5. Type \( C \) 118
  3.6. Type \( D \) 119
  3.7. Exercises 121

Chapter 4. Composition Algebras and Type \( G_2 \) 123
  4.1. Hurwitz algebras 123
  4.2. Gradings on Cayley algebras 130
  4.3. Gradings on \( \mathfrak{psl}_3(F) \), \( \text{char } F = 3 \) 137
  4.4. Derivations of Cayley algebras and simple Lie algebras of type \( G_2 \) 140
  4.5. Gradings on the simple Lie algebras of type \( G_2 \) 146
  4.6. Symmetric composition algebras 149
  4.7. Exercises 160

Chapter 5. Jordan Algebras and Type \( F_4 \) 163
  5.1. The Albert algebra 164
5.2. Construction of fine gradings on the Albert algebra
5.3. Weyl groups of fine gradings
5.4. Classification of gradings on the Albert algebra
5.5. Gradings on the simple Lie algebra of type $F_4$
5.6. Gradings on simple special Jordan algebras
5.7. Exercises

Chapter 6. Other Simple Lie Algebras in Characteristic Zero
6.1. Fine gradings on the simple Lie algebra of type $D_4$
6.2. Freudenthal’s Magic Square
6.3. Some nice gradings on the exceptional simple Lie algebras
6.4. Fine gradings on the simple Lie algebra of type $E_6$
6.5. Fine gradings and gradings by root systems
6.6. Summary of known fine gradings for types $E_6$, $E_7$ and $E_8$
6.7. Exercises

Chapter 7. Lie Algebras of Cartan Type in Prime Characteristic
7.1. Restricted Lie algebras
7.2. Construction of Cartan type Lie algebras
7.3. Automorphism group schemes
7.4. Gradings
7.5. Exercises

Appendix A. Affine Group Schemes
A.1. Affine group schemes and commutative Hopf algebras
A.2. Morphisms of group schemes
A.3. Linear representations
A.4. Affine algebraic groups
A.5. Infinitesimal theory

Appendix B. Irreducible Root Systems
