Index

\((\chi_n)_{n \geq 0}\), Haar basis 29
\((\phi_n)_{n \geq 0}\), Schauder functions on \([0, 1]\) 29

action functional, 9
albedo, 2

Brownian motion, 28

\(C([0,T], \mathbb{R}^d)\), \(\mathbb{R}^d\)-valued continuous functions on \([0,T]\), 49
\(C_0^\infty(\mathbb{R}, \mathbb{R})\), infinitely differentiable real valued functions on \(\mathbb{R}\) vanishing at \(\pm \infty\) 92
\(C_c^\infty(G, \mathbb{R})\), real valued infinitely smooth functions of compact support contained in an open set \(G \subset \mathbb{R}\), 70
\(C^k(\mathbb{R}, \mathbb{R})\), real valued functions on \(\mathbb{R}\) with continuous \(k\)-th derivative 92
\(C_0([0,T], \mathbb{R}^d)\), \(\mathbb{R}^d\)-valued continuous functions on \([0,T]\) starting at 0, 51
\(C^\alpha([0,1], \mathbb{R})\), space of \(\alpha\)-Hölder continuous real valued functions on \([0,1]\) starting at 0 28
\(C_0^\alpha([0,1], \mathbb{R})\), separable subspace of real valued \(\alpha\)-Hölder continuous functions on \([0,1]\) starting at 0, 32

Ciesielski isomorphism, 28
\(c_0(\mathbb{N}_0, \mathbb{R})\), space of bounded sequences of real numbers 28

contractive principle, 40
inverse, 41
dissipativity condition, 53

entropy, 87
exponential tightness, 38

\(\mathcal{H}_1([0,T], \mathbb{R})\), \(\mathcal{H}_1\), Cameron–Martin space of real valued functions on \([0,T]\), 46
\(\mathcal{H}_1([0,T], \mathbb{R}^d)\), \(\mathcal{H}_1\), Cameron–Martin space of \(\mathbb{R}^d\)-valued functions on \([0,T]\), 50
condition \((\mathbf{H})\), 139
hysteresis loop, 22

interval of resonance, 20

\(L(\mathbb{R}, \mathbb{R}; \rho dx)\), real valued functions on \(\mathbb{R}\) which are square integrable with weight \(\rho\) 93
\(L^2([0,T], \mathbb{R}^d)\), Lebesgue measurable \(\mathbb{R}^d\)-valued square integrable functions on \([0,T]\) 29
\(l^\infty(\mathbb{N}_0, \mathbb{R})\), space of bounded sequences of real numbers 28

large deviation principle, 37
weak, 38

LDP, see also large deviation principle

\(\|\cdot\|_\alpha\), \(\alpha\)-Hölder norm 28
\(\|\cdot\|_\infty\), \(\|\cdot\|\), uniform norm 28

Ornstein–Uhlenbeck process, 8
quasipotential, 9

relative entropy, 86
resonant activation, 22
rate function, 37
good, 37

Schilder’s theorem, 50
Schmitt trigger, 22
spectral gap, 111
spectral power amplification coefficient, 13, modified 129

stochastic resonance, 1
