Preface	ix
Chapter 7. The Stages of Theorem $\mathcal{C}_7^*$	1
1. Introduction	1
2. The Ranking Function $\mathcal{F}$	6
3. The Set $\mathcal{J}_p^*(G)$ , and the Four Cases	7
4. The Sets $\mathcal{J}_p^1(G)$ and $\mathcal{J}_p^2(G)$ , and How to Modify Stages 2 and 3a	8
5. Component Pairs	11
6. The Remaining Stages of Theorem $\mathcal{C}_7^*$	12
Chapter 8. General Group-Theoretic Lemmas	19
1. $p$ -Groups	19
2. Pumpups and $p$ -Terminality	20
3. Balance and Signalizers	27
4. Components and Coverings	28
5. Representations and Cohomology	29
6. Fusion and Transfer	31
7. Miscellaneous	35
Chapter 9. Theorem $\mathcal{C}_7^*$ : Stage 3b	39
1. Introduction	39
2. Theorem 2: The Setup and Special Cases	41
3. The Cases $K \cong A_n$ or $K \cong He$ , with $p = 2$	45
4. The $F_5$ Case	54
5. $p$ -Thin Configurations, $p$ Odd	56
6. The General Lie Type Case, Begun	63
7. The General Lie Type Case, Concluded	75
8. The $p = 2$ , $SL_2(q)$ case	88
9. Theorem 3	95
10. Theorem 4: The Prime $s$	102
11. The $s$ -Uniqueness Case	111
12. Theorem 5: The General Case	115
13. Theorem 5: Residual Cases, $p = 2$	121
14. Theorem 5: Residual Cases, $p > 2$	126
15. Theorem 6	143
Chapter 10. Theorem $\mathcal{C}_7^*$ , Stage 4a: Constructing a Large Alternating Subgroup $G_0$	145
1. Introduction	145
2. Theorems 1 and 2: Most Sporadic Components	147

3.	Theorems 1 and 2: $J_1$ and Ree Components	149
4.	The Alternating Case: Theorem 3–Centralizers of Rank 2	152
5.	Theorem 4–Centralizers of Rank 1: Preliminaries	157
6.	Theorem 4–All Alternating Group Neighbors	160
7.	Theorem 4–Non-Alternating Group Neighbors	167
8.	Theorem 4–The Final Case: $2HS$ Neighbors	175
Chapter 11. Properties of $\mathcal{K}$ -Groups		181
1.	Everyday Tools	181
2.	Automorphisms and Coverings	189
3.	$p$ -Rank and $p$ -Sylow Structure of Quasisimple Groups	191
4.	Computations in Alternating Groups	196
5.	Computations in Sporadic Groups	198
6.	Computations in Groups of Lie Type	203
7.	Small Groups	217
8.	Embeddings	222
9.	Recognition Theorems	223
10.	Balance	223
11.	Subcomponents	224
12.	Pumpups and the Ranking Function $\mathcal{F}$	226
13.	Pumpups	231
14.	Acceptable Subterminal Pairs, I	262
15.	Acceptable Subterminal Pairs, II	271
16.	Neighborhoods	277
17.	Generation	288
18.	Splitting Primes	292
19.	Double Pumpups	298
20.	The Double Pumpup Propositions	303
21.	Monotonicity of $\mathcal{F}$ , and $\mathcal{J}_p^2(G)$	320
22.	Miscellaneous	337
Bibliography		341
Index		343
